

PARKA HAVEP® MULTI PROTECTOR+ - Model 50509

Collection

HAVEP® Multi Protector+

Norms

EN ISO 13688: 2013

A1: 2021

Description

Stay visible, protected, and comfortable while working in the most challenging conditions. This lined multi-standard parka combines high visibility, protection against flames and arc flashes, waterproofing, and breathability in a single advanced garment. This makes it an ideal choice for professionals working in environments where safety and weather protection go hand in hand.

The parka offers APC 2 protection against the thermal hazards of an arc flash and meets seven safety standards. Thanks to its lined construction, you stay comfortable in colder conditions, while its breathable properties prevent heat from building up. The mechanical stretch provides extra freedom of movement, and the Advanced Layering System allows you to combine the parka with other Multi Protector+ items for a flexible clothing package that adapts to the conditions. Wind and rain don't stand a chance thanks to the taped seams and high-quality waterproof construction.
