Description

Stay visible, dry, and protected in demanding work environments. This multinorm rain shell combines high visibility, flame-retardant protection, antistatic properties, and protection against liquid chemicals with excellent waterproofing and breathability. Thanks to EN 343 Class 4/4, you can continue working comfortably, even during prolonged rainfall.

The mechanical stretch provides extra freedom of movement, while the taped seams, high collar, and extended back panel offer protection against wind and rain. With APC 1 protection against the thermal hazards of an arc flash and certification to seven safety standards, this rain shell offers a versatile solution for professionals who refuse to compromise on safety or comfort. Thanks to the Advanced Layering System, the jacket can also be easily combined with other Multi Protector+ items for extra warmth and flexibility.

Characteristics

- High collar
- Chin guard
- Center-front closure with concealed zipper; panel closes with Velcro
- 2 gas mask loops
- 1 chest pocket with flap and snap closure
- 2 inset side pockets with flaps and snaps; 1 D-ring on right pocket
