HAVEP

POWERED BY QUANTACORP

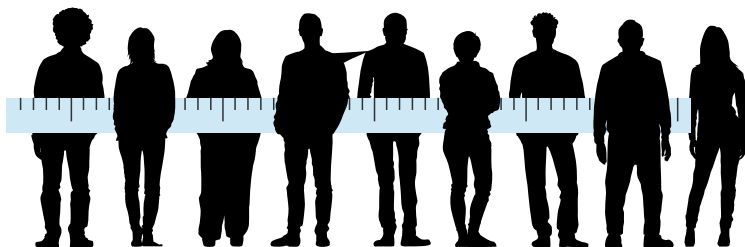

Innovative fitting in just a few minutes

Organising fitting sessions for your customers can be a time-consuming affair! Both for you and for them. Taking all those sample outfits with you on location and then manually recording the corresponding sizes... All in all, a lot of time and energy better spent on other things! Which is why HAVEP has introduced an innovative solution: HAVEP Easy Sizing, the **digital fitting service** that makes the entire process a lot quicker and easier.

Newly developed technology now makes it possible to create an **accurate 3D scale model** of the person being measured, simply by taking 2 photos of them using an iPad. The software then translates this 3D model into **the correct HAVEP clothing size (the size passport)**, without once needing to reach for the measuring tape. This digital fitting service saves you a lot of time, since the scan itself can be done in less than 1 minute.

The service is also **completely mobile**, which means you can take measurements wherever and whenever convenient. A bonus for you and your customer, especially if you have to make a couple of trips to take everyone's measurements. There is also **no physical contact** required anymore to complete the process. And people don't have to wear especially tight-fitting clothes during the scan. As long as their clothing is not too loose and the contours of their body are clearly visible, the system is perfectly adapted to produce an accurate scan. Making the whole process of finding the right size a walk in the park.

Another main advantage of this digital fitting service is that you **don't have to drag samples around** anymore or worry about getting them dirty in transit. By using our efficient Easy Sizing service, you'll also be giving your professional image a boost while **saving both time and money**.

What is digital fitting?

Revolutionary new software now makes it possible to take someone's measurements digitally. Two scans is all it takes to create a digital 3D model of someone's body in less than 1 minute. This scale 3D model is based on **more than 100 individual measurements**. Which means you can be sure it's accurate!

The software then translates the measurements into the **right size**. Whenever you use HAVEP Easy Sizing, we make sure that all the online sizing tables are up to date for **your chosen HAVEP collections**. As soon as you add an item of clothing to the database, you can then use the specific measurements for all your projects.

What do you need?

Measuring someone digitally is really very easy. There are just a few things you need, which we provide once you have signed the contract:

- ✓ a license for the software
- ✓ an iPad with special camera & app
- ✓ a mat to quickly indicate the precise position for scanning
- ✓ a User ID for the online platform

You can very easily take all these items with you, which means you can be **completely flexible** in terms of planning the time and location of your fitting sessions. And our payment terms for this service are just as flexible, too!

Take a look at "Getting started" below for more details.

Easy scanning via the app

The mobile app on the iPad makes scanning easy! This “**fitting station**” uses the built-in camera to carry out the necessary scans and easily look up “size passports” to see which items of clothing match your measurements. The data from the fitting station is then automatically sent to the management portal (more about that below).

Please note: to carry out scans, you will need a WiFi or mobile data connection.

Manage your data easily and securely online

The **management portal** makes it very easy to manage your data before, during and after each fitting session. All you have to do is log in to your account to access your **personal dashboard** and check the status of **all your projects at a glance** and centralise all your measurements while also making it easy to work together.

What can you do with the dashboard?

The management portal dashboard is **very user-friendly**. You can work with multiple users and projects at the same time. Moreover, you can manage all the data from one central point. This central dashboard lets you:

- ✓ Configure your clothing tables.
- ✓ Manage different projects at the same time.
- ✓ View the status of all your projects.
- ✓ Look up user size passports.
- ✓ Export your measurements in a CSV file.
- ✓ Set up groups, so you can filter measurements by location, division or a specific customer.
- ✓ Upload customer employee lists, avoiding the hassle of manually editing Excel sheets.
- ✓ Transparent: tick off each person as they are being fitted.

Placing an order

Export your measurements directly from your dashboard to your system and place your order via your usual purchase order.

Getting started

In order to use our digital fitting service, you will need to pay for the **software license**. There is then a small fee per fitting. Naturally, you can also rent the system from us at an hourly rate plus a fee per fitting. Ask your account manager for a quote.

Scanning requires an **iPad mini with a camera**. This camera is specially calibrated and has a structure sensor. The corresponding app (the fitting station) also needs to be installed on the iPad and properly calibrated. The iPad comes supplied in a strong and sturdy case.

As well as an iPad, you will also need a special HAVEP Easy Sizing measuring mat. The mat makes it easy to find the correct position for people being fitted, making the whole process fast and efficient. We will provide you with a free mat with the HAVEP logo. If you would prefer to have your own mat with your own logo, we can provide one for an additional charge.

At HAVEP, we are always looking for ways to make your life easier, which is why we include **everything you need in one handy package**. The only thing you need to do yourself is create an account and set up your dashboard. And if you need help getting used to the digital fitting platform, we will give you a **free 2-hour introductory course** and are always on hand in case of questions. Someone from HAVEP will also accompany you on your first fitting session, to make sure everything goes **smoothly and hassle free**.

Customer service is here for you

Have any questions about HAVEP Easy Sizing? Don't hesitate to ask them via marketing@havep.com. And if you have specific questions about the software, there's a good chance you'll already find the answer online via: www.havep.com/nl-en/easysizing.

The benefits of HAVEP Easy Sizing

— — —

Our efficient digital measuring service saves you a huge amount of time, while helping to project a **professional image**. But that's not all! HAVEP Easy Sizing also ensures:

- ✓ Considerable time savings per fitting.
- ✓ Flexible fitting, no matter what the location.
- ✓ Consistent measurements based on 100 measuring points.
- ✓ No physical contact and your customers can keep their clothes on.
- ✓ An unlimited number of measurements.
- ✓ Instant display of the correct size.
- ✓ Easy administration via the online dashboard.
- ✓ No more fitting samples required.
- ✓ Secure upload and storage of all data in the cloud linked to the online platform.

Want to be able to fit your customers as quick as a flash, too?

The speed and accuracy with which the clothing sizes are determined by the Tool depends on how the Scan is performed, the person who performs the Scan and the conditions in which they perform it. Since HAVEP has no control over these factors, HAVEP cannot provide a guarantee with regards to the results determined by the Tool.
